

Database 1 - 14012301-3

Group Project – Phase III

Dr. Omniah Nagoor

3rd Trimester 1445H – 2023/2024

Phase III

- In this phase, you should provide:
 - SQL definition commands in MySQL Workbench to:
 - create the project database/schema using **CREATE SCHEMA**, and
 - create the schema tables using **CREATE TABLE**.
 - SQL data manipulation commands:
 - insert data into the tables (the minimum is five rows of data per table). Use **INSERT** command.
 - Minimum of TWO commands to:
 - update data in a table (using **UPDATE**), and
 - delete data from a table (using **DELETE**).

Phase III

- SQL Queries using SELECT command:
 - Minimum of 10 commands - Commands **SHOULD INCLUDE:**
 - WHERE,
 - GROUP BY,
 - HAVING,
 - ORDER BY,
 - subqueries and
 - join operations.

Phase III

Due date: **Monday 5/2/2024**

Deliverables:

1. Pack all of your work in the previous phases in **ONE pdf file**. The file should include:
 - Cover page (project title, group number and names, section number),
 - Group work report in all phases,
 - Phase 1 after refinement (if any),
 - Phase 2 after refinement (if any),
 - Phase 3: screenshots for the commands and their results.
2. An **sql file** containing all the SQL commands executed on your project schema.
